

## HANDY HINTS THAT YOU MAY WANT TO KNOW!

### Carparking Expenses

Discounted, multi-day carpark vouchers are available from security, located at Hollywood Private Hospital (HPH) Reception (Gate 2) and Leslie Starcevic Day Suite.

### Breast Prosthesis

This is a BCRC-WA initiative provided by our Breast Cancer Nurses, where a prosthesis can be purchased and fitted at PBCI.

### Chemotherapy Treatment

If this is needed, it will be given in the Leslie Starcevic Day Suite, located within HPH main building. There is no need to bring in food or drink as this is provided by HPH.

### Chemowise

This is a pre-chemotherapy education session available to early breast cancer patients being treated by any PBCI medical oncologist. The session provides information about what to expect on the day of chemotherapy, pharmacy, diet and advice from a representative from 'Look Good Feel Better'.

### Cold Cap

This device is available at no cost to women receiving chemotherapy that can lead to hair loss. This will be discussed with you by the PBCI Medical Oncologist. You can access the results of our clinical trial on effectiveness of the cold cap at [bcrc-wa.com.au](http://bcrc-wa.com.au).

### Cafés

There are several located in each of the medical centers at HPH and along Hampden Road (500 meters from HPH down Monash Ave towards Winthrop Ave). A café cart is also located on the 4th Floor of Hollywood Consulting Centre.

### Blood Tests

Specialists at PBCI request that where possible, you have blood tests done at any Western Diagnostic Pathology across Perth, as this allows for easy electronic access to results. Western Diagnostic Pathology can provide home blood collections for patients who are house bound (please discuss this with your specialist to see if you are eligible).

**PERTH BREAST  
CANCER INSTITUTE  
(PBCI)**

## PERTH BREAST CANCER INSTITUTE (PBCI)

This new centre aims to meet the needs of patients diagnosed with breast cancer by addressing all aspects of treatments, as well as supporting each patient and their family through diagnosis, treatment and recovery. There is access to clinical trials for both early and metastatic breast cancer and a broad range of support services, including clinical psychology and genetic counselling.

The approach will be to connect each patient with a care coordinator, who will help manage their treatment journey, linking each patient with the necessary support services, whilst also providing support to husbands, partners and children. This will allow the patient to concentrate on the treatment and recovery process, ensuring they receive the best evidence-based management possible.

## PBCI BREAST ASSESSMENT CLINIC STARTING FEB 2021

This clinic is provided by our Breast Physicians, who are General Practitioners with training and experience in the assessment of an abnormal mammogram or ultrasound, or patients with breast symptoms.

Women can be seen in this clinic for a rapid assessment and diagnosis of their breast problem, either through self-referral or by referral from their GP. They can also attend following the identification of an abnormal mammogram from BreastScreen WA.

## SPECIALISTS AND ALLIED HEALTH CARE PROVIDERS

- Breast Surgeons
- Medical Oncologists
- Radiation Oncologists
- Breast Physicians
- Breast Nurses
